

Top 5 Reasons TO CHOOSE **A10**

1 FUTURE PROOF

A10 delivers reliability, a rich feature set, scalability, flexibility, and performance – in either a virtual or 1RU hardware form factor. Updates, as well as feature additions and modifications can be performed quickly and easily. Benefit from a “future proof” platform that fits your current requirements while easily scaling to meet future needs.

2 PER-APP CONTROL

A10 delivers high density partitioning, enabling granular control and unsurpassed flexibility. In addition, ACOS was built specifically for modern-day high core count CPUs, enabling simultaneous running of multiple services/modules without degrading performance.

3 SUPERIOR VALUE

A10 employs a single all-inclusive license that allows you to run a wide range of functional modules simultaneously with no feature limits – and better performance scalability. You get everything you need to run your business and support your infrastructure, without complex licensing schemes and escalating price points.

4 CLOUD NATIVE

In addition to high-performance hardware and flexible virtual form factors, A10 delivers the industry's first truly cloud-native solution for traffic management for applications on public and private clouds – for increased operational agility and efficiency. App-specific proxies that optimize app delivery can be located in the cloud and be centrally managed, controlled and monitored from a central site.

5 WORLD-CLASS SUPPORT

A10 delivers world-class technical support using first rate System and Escalation Engineers, as well as core software and hardware engineers – providing immediate assistance and easy escalation paths.
